3) Velcro Attachment
4) Elastic Retention Straps
5) Shoulder Strap Rings
6) User Harness Rings
7) Forearm Straps*
8) Retention Strap Glides
9) Retention Strap Slots

*There is a risk of low temperature burns if end user places forearm over exhaust vent.

1 Installing Your TOUGHBOOK 55 on the ModuFlex

With your device closed, and the bottom facing the ceiling, using the provided Velcro Template, adhere the black Hook Velcro to the bottom of the machine, making sure it aligns with the Loop Velcro (3) on the inside of the case. Be sure to allow 24 hours for the adhesive to cure.

2 Align the machine base in the center of the ModuFlex (make sure battery release (2) is visible and press the Velcro together carefully.) Pull both nylon retention straps (1) up under the device's built-in handle.

3 Wrap the nylon retention strap (1) over the base of the device and insert it through the slot (9). Pull the strap through the glide (8), eliminating any slack. Then fold the strap over, engaging the Velcro. Stretch the Elastic Retention Straps (4) over the back corners of the machine.

Note: The retention straps are designed to be easily loosened by undoing the Velcro in order to remove the batteries.

Shoulder Strap or Optional User Harness Use

The Toughmate 55 ModuFlex includes D-rings (5, 6) for shoulder strap or four point user harness utilization. These provide hands free transportation and use of your TOUGHBOOK 55.

Warranty

InfoCase products are dynamic, consistently improved and reinvented to bring you the best products on the market. We use only the highest quality materials to meet your mobile technology demands.
